Setup Remote Machine

Add user

1.
```
# while as root user
useradd -m -s /bin/bash -G sudo manas
# -m is to create a home directory
# -s to provide default shell
# -G is to provide groups

# To add password
passwd manas
```

2. You can check user added and shell in file: `/etc/passwd`. To check group, type `groups manas` in terminal.
3. Login into new user created. You may want to change hostname (hostname@username:cwd_path>)
